

Campbell Wright

College Station, TX | (979)402-7480 | camptwright@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Student Coordinator and Computer Engineering senior with experience in software development, IT systems administration, and technical leadership. Improved operational efficiency by 20% and boosted user efficiency by 30% through key projects and process enhancements. Built full-stack applications and supported enterprise IT operations. Ready to contribute strong technical and teamwork skills to a junior software engineering role.

EDUCATION

Texas A&M University, College Station, Texas

Aug 2022 - May 2026

B.S., *Computer Engineering, Minor in Mathematics* (GPA: 3.15/4.00)

- **Coursework:** Computer Architecture, Advanced Computer Architecture, Data Structures & Algorithms, Database Systems, Microcomputer System Design, Digital Integrated Circuit Design, Communication & Cryptography, Computer Systems Design

WORK EXPERIENCE

Texas A&M University Technology Services | *Student Coordinator*

May 2025 - Present

- Coordinated and assigned tasks to student technicians, aligning with their skill levels, which increased operational efficiency by optimizing resource allocation.
- Enhanced team performance and response times by training new technicians, managing the ticketing queue, and serving as the first point of escalation.
- Crafted and implemented knowledge base documentation and recommended policy enhancements that streamlined operations and improved efficiency by 20%.

Student Technician

Feb 2023 - May 2025

- Provided Tier 1–2 IT support using Active Directory, SCCM, Windows Remote Assistance, and Bomgar, reducing resolution times by 40%.
- Performed system imaging, hardware diagnostics, and component installation on enterprise devices, increasing deployment speed by 30% and reducing hardware failures.

Reynolds & Reynolds | *Software Developer*

Jun 2022 - Aug 2022

- Enhanced system reliability and user satisfaction by developing and debugging KeyTrak programs, leading to a 30% increase in user efficiency.
- Developed and tested projects with technical designs that improved workflow efficiency and consistently met client demands.
- Utilized technical skills in JavaScript, PostgreSQL, C#, and React.js to lead successful completion of new projects and resolve complex software issues efficiently

Hardware Technician

Feb 2022 - Jun 2022

- Enhanced and repaired customer hardware-including printers, computers, servers, scanners, network equipment, and key-tracking systems-to boost equipment efficiency and maximize customer satisfaction.
- Implemented methodical processes to optimize efficiency and accuracy, leading to a 20% improvement in task completion time.

Higginbotham Summer Internship Program | *Employee Benefits Intern*

May 2025 - Aug 2025

- Collaborated with interns to develop a clear project plan that outlined key milestones, leading to better team coordination and on-time project delivery.
- Participated in service and carrier connection activities in the Dallas-Fort Worth metroplex, strengthening industry relationships and improving networking effectiveness.
- Gained in-depth knowledge of Higginbotham's service portfolio and supported senior staff on key projects, improving project workflows and strengthening my understanding of industry practices.

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Python, Java, JavaScript, TypeScript, Verilog, ARMv8, SQL, PHP, Haskell
- **Frameworks & Tools:** React, Node.js, Git/GitHub, Linux, PostgreSQL, REST APIs, Unity, MySQL
- **Systems & IT:** Active Directory, Microsoft Endpoint Configuration Manager (SCCM), Microsoft Endpoint Manager, CrowdStrike, Windows Deployment, Linux, Microsoft 365, Elastic Security Client
- **Hardware:** Embedded systems, hardware diagnostics, imaging, component installation, network hardware maintenance
- **Certifications:** Microsoft 365, COMPTIA Security+ (pending), COMPTIA Network+ (pending)

PROJECTS

Gyroscope-Controlled Sports & Stock Ticker

- Designed and implemented an embedded system controlled via gyroscopic input to navigate real-time sports and financial data.
- Integrated live APIs and optimized data display for low-latency output.

Fitness Tracker iOS & Web Application

- Built a React-based web application to track workouts, caloric intake, and fitness progress.
- Implemented REST APIs and persistent data storage to manage user activity and analytics.

Fantasy Sports Probability Calculator

- Developed a Python application to analyze historical sports data and generate probabilistic performance predictions.
- Applied statistical models to forecast outcomes and player scoring trends.

Personal Home Server

- Configured a Linux-based home server for web development, testing, and database hosting.
- Deployed web applications and managed server security and maintenance.

INVOLVEMENT

TAMU Faculty-Led Computer Architecture Study Abroad | *Student*

May 2024 - Jun 2024

- Studied Computer Architecture and Advanced Computer Architecture at UCLouvain in Belgium
- Built and studied a single-cycle processor using ARMv8 and Verilog, studied memory allocation and branch prediction
- Took technical visits to companies around Belgium such as WSL, Lasea, and TaiPro

Freshmen Exemplifying Aggie Spirit Together (F.E.A.S.T.) | *General Member*

Sep 2022 - May 2024

- Planned and coordinated service events and activities for the organization
- Participated in various social and service events around the Brazos Valley
- Took time as a mentor to new freshmen in the organization
