

CAMPBELL WRIGHT

College Station, TX | camptwright@gmail.com | <https://camptwright.github.io>

EDUCATION

Texas A&M University

B.S. Computer Engineering, Minor in Mathematics | College Station, TX

Aug. 2022 - May 2026

Texas A&M University

M.S. Artificial Intelligence (Online) | College Station, TX

Beginning Aug. 2026

Study Abroad: UCLouvain, Belgium (Summer 2024): Computer Architecture and Advanced Computer Architecture

Relevant Coursework: Computer Systems Design, Networks and Distributed Processing, Foundations of Software Engineering, Digital Integrated Circuit Design, Database Systems, Data Structures and Algorithms, Programming Languages, Information Storage and Retrieval

WORK EXPERIENCE

Software Engineer | Lockheed Martin

Jul. 2026 - Present | Fort Worth, TX

Student Coordinator | Texas A&M University Technology Services

May 2025 - Present | College Station, TX

- Led and coordinated a team of student technicians, assigning tasks aligned to skill level and optimizing operational efficiency
- Developed and implemented knowledge base documentation and policy enhancements, improving team efficiency by 20%
- Served as primary escalation point for Tier 2 technical issues, managing ticketing queue and reducing average resolution time

Student Technician | Texas A&M University Technology Services

Feb. 2023 - May 2025 | College Station, TX

- Delivered Tier 1 and 2 IT support using Active Directory, SCCM, and remote access tools, reducing resolution times by 40%
- Performed system imaging, hardware diagnostics, and enterprise device deployment, increasing deployment speed by 30%
- Contributed to enterprise-wide CrowdStrike remediation, Windows 11 deployment, and BIOS update campaigns across Division of Student Affairs infrastructure

Employee Benefits Intern | Higginbotham

May 2025 - Aug. 2025 | Dallas-Fort Worth, TX

- Developed a comprehensive embedded insurance roadmap, analyzing market trends and defining implementation milestones and success metrics
- Collaborated with cross-functional stakeholders to coordinate project planning and on-time delivery of strategic initiatives

Software Developer | Reynolds and Reynolds

May 2022 - Aug. 2022 | College Station, TX

- Developed and debugged KeyTrak programs in JavaScript, C#, React.js, and PostgreSQL, increasing user efficiency by 30%
- Designed and tested software solutions from concept to production, improving workflow efficiency and consistently meeting client requirements
- Resolved complex software defects and delivered new features in a cross-functional team environment using modern development practices

PROJECTS

PathPro: Forensic Documentation Platform | Flutter, ASP.NET Core, Azure, REST APIs

Jan. 2026 - Present

- Engineered a full-stack forensic pathology platform with a Flutter cross-platform UI, ASP.NET Core backend, and Azure cloud deployment supporting PHI-compliant data handling
- Designed and implemented a modular diagram editor with multi-agent development architecture, TestFlight iOS distribution, and stub/live backend toggle via build configuration

FSAE Electric Display System | PCB Design, KiCad 9.0, CAN Bus, Embedded C, Raspberry Pi

Jan. 2026 - May 2026

- Designed two custom PCBs including a Raspberry Pi 4B HAT with CAN bus, GPS, and HDMI interfaces for real-time vehicle telemetry acquisition and display
- Implemented CAN bus communication using MCP2515 and SN65HVD230 transceiver at 500 kbps with a 12V to 5V MP1584EN buck converter and validated against BMS and motor controller data

Personal Home Server | Linux, System Administration, Docker, Web Development

Aug. 2025 - Present

- Configured and administered a Linux-based home server for web application deployment, database hosting, containerized services, and proactive security management

Budget Tracker Web Application | JavaScript, HTML, CSS, Web Development

Jun. 2025 - Present

- Developed a responsive web application for personal finance management with expense categorization, budget planning, and financial reporting across all device form factors

Fitness Tracker Web and iOS Application | React, Node.js, REST APIs, Supabase

Mar. 2025 - Present

- Built a full-stack application with a React web frontend and Swift iOS client to track workouts and caloric intake with persistent data storage and analytics dashboards

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C#, C, C++, Java, SQL, PHP, Haskell, Verilog, ARMv8

Frameworks and Tools: React, Node.js, ASP.NET Core, Flutter, REST APIs, Git/GitHub, PostgreSQL, MySQL, Linux, Docker

Systems and IT: Active Directory, SCCM, Microsoft Endpoint Manager, CrowdStrike, Windows Deployment, Microsoft 365

Hardware: Embedded Systems, PCB Design, KiCad, CAN Bus, SPI/UART Protocols, Hardware Diagnostics

Certifications: Microsoft 365 (Current); CompTIA Security+ (Pending); CompTIA Network+ (Pending)
